Office

Global enquiry update – Sales Orders

The "Area ref" from the site associated with the Sales Order is now available as field on the Sales Order global enquiry, via the choose fields menu. The field is hidden by default.

Accounts link

Sage 50c 2024 v30

The latest release now support that latest version of Sage 50c with full batch update and import/export capabilities.

Mobile

Use URL SSL setting

New setting ("use URL security certificate") has been added to the Protean mobile app in 'Settings' → 'Advanced Server Detail'. This removes the requirement to update/import SSL certificates that have expired on an annual basis.

Stock search results

The stock search results description has been expanded to accommodate 80 characters; text will also wrap to the next line if restricted by resolution or screen size.

Android 13 Support

The Protean mobile app has been updated to support Android 13.
